Tool Advices

The paper used by Amazon is most suitable for soft-colored pencils. If you use them, be sure to keep them sharp so you can get a better result on every detail. If you prefer to use markers, gel pens or similar, we suggest to place an extra blank paper sheet behind your page to avoid any bleed through which might happen. You can even take your page out of the book if you want.

Colors Choice

We prepared for you a color test page on the next page. Try out on this page your color and find the better combination. We advise you to test the colors you want to use every time as sometimes they can appear differently on paper than you can expect.

Experiments

If you come to an image you don't feel it's suitable to be colored in this moment, leave it there, you can pick it up again another day! We recommend practicing every day it helps to be more relaxed each time.
